

GIVE A SECOND LIFE TO YOUR DORMANT STOCKS

The **industrial reuse marketplace**

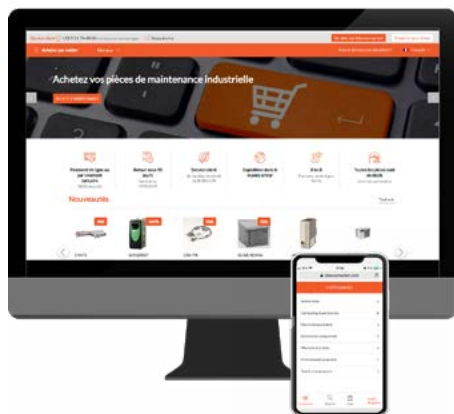

WHAT IS DORMANT STOCK OR SURPLUS?

Across the world, millions of industrial maintenance parts are stored in warehouses.

Over time, your production lines evolve, and some parts have become obsolete, orphaned or in excessive quantities.

These surpluses generate **unnecessary logistics costs** and **clutter up your storage spaces**.

It is necessary to identify them formally and assess their composition : **they can earn you thousands of euros!**

A dormant stock or surplus is a set of immobilized parts, unused, which may be **new, refurbished or used** and in excellent working order.

Some parts are no longer manufactured and are highly sought after by your peers!

These dormant stocks have a value, sell them!

WHY SELL YOUR DORMANTS & SURPLUSES?

Save money

Value your equipment instead of destroying it

Manage your stocks smartly

Reduce the dormant inventory levels of your warehouses and the obsolescence of your parts

Sell your dormant parts in a few clicks

Registration and sale service 100% free and carried out by us

Help making the planet greener

Give new life to your parts to reduce the consumption of our planet's precious resources

Platform for the **reuse** of **industrial maintenance parts**

HOW TO SELL YOUR DORMANTS & SURPLUSES?

1. Provide the basic data of your dormant parts (parts references, brands, quantities for sale, last purchase price, condition).
2. Upon receipt of orders, prepare the goods and hand them over to the carrier.
3. We manage the logistics and remunerate your sales.

Let's commit to a responsible industry based on the circular economy and reuse.

AN INNOVATIVE OFFER

BUY

Buy online your industrial maintenance parts, new, refurbished or used.

SELL

Entrust us with the list of your dormant parts. We clean and deduplicate your databases. We sell on your behalf, automatically.

FIND

Send us your obsolete parts lists and we will find them for you.

ABOUT KHEOOS

kheos is the community platform that allows manufacturers managing industrial maintenance parts to automatically build their personalized catalog and benefit from advanced services for:

1. Lower their stock levels,
2. Reduce their risk of breakage,
3. Find rare parts,
4. Resell their dormant stock,
5. And engage in a circular economy approach.
